

Kench Justin Loyola

Project Manager and Web Developer

104 Capricorn St. Batimana Compound Marulas , Valenzuela City, Philippines | kenchjustin@gmail.com | 09632933518

Experience

Feasify | Project Manager, Lead Dev

- **Architected a responsive React (TypeScript) and Vite workspace** with Tailwind CSS and Recharts to render dynamic 5-year financial projections, increasing proposal completion rates by **40%**.
- **Integrated Gemini API via an Express backend** to build an automated stress-testing engine, evaluating qualitative proposal rubrics and financial math to identify business risks **35% faster**.
- **Optimized Firestore real-time queries** via query constraints and programmatic JavaScript data-flattening, decreasing cloud read exceptions by **90%** and **lowering token utilization by 25%**.
- **Engineered a synchronized Socket.io and Firestore chat** with localStorage caching and custom optimistic message IDs, reducing page-refresh data loss and active-session UI freezes by **95%**.
- **Designed a responsive dashboard workspace** utilizing flexbox scroll-locking and dom-to-image rendering for executive PDF exports, preserving standard layouts at a steady **60 FPS**.

Game Dev - Rise of the Bakunawa | Project Manager

- **Coordinated cross-functional workflows using Agile and Kanban** via Jira and GitHub, aligning parallel art and programming pipelines to reduce development sprint slippage by **15%**.
- **Streamlined the Unity asset integration pipeline** for 3D models and UI assets from 3ds Max and Photoshop, reducing engine import bottlenecks by **10%** and **maintaining a stable target of 60 FPS**.
- **Managed the feature design and development** of a digital companion mobile app, integrating interactive features with the physical TCG board game to reduce manual state-tracking errors by **40%**.
- **Established a structured playtesting and QA framework** to balance TCG mechanics and resolve software issues, identifying over **30+ bugs** and **reducing mechanical balancing friction by 35%**.
- **Directed booth logistics and player rotation** during a high-traffic exhibition, onboarding **100+ active players on showcase day** to win the **1st Place People's Choice Award over 28 competing teams**.

AttendScan | Lead Dev

- **Architected a responsive React 19 and TypeScript SPA** utilizing React Router v7 nested routing to segregate public authentication from complex administrative views, improving page navigation speed by **35%**.
- **Engineered a hybrid QR scanning module** wrapping html5-qrcode for real-time camera stream and file upload decoding, reducing average student check-in times to **under 2 seconds with near-zero latency**.
- **Developed a centralized React Context state model** with useMemo caching for student rosters and records, reducing DOM re-renders by **30%** and **keeping dashboard analytics responsive on mobile devices**.
- **Designed mobile-first responsive dashboards** with Tailwind CSS featuring fluid-collapsible sidebars and native custom modals, preserving consistent layout performance across viewports at a steady **60 FPS**.
- **Programmed administrative tools** for daily QR code generation and multi-criteria database filters, reducing manual attendance logging errors by **40%** while **streamlining system configuration**.

Education

Pamantasan ng Lungsod ng Valenzuela

3rd Year Student, Aug 2023 to Apr 2027
